medical conditions effects on functional limitations in elderly, 386-391
Clinical trials
Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
The HERITAGE Family Study, 520-529
The Women's Health Trial Feasibility Study in Minority Populations, 507-519
Cognitive function, diabetes, hypertension, stroke, and, 392-398
Cohabitation, cardiovascular disease risk factors and, 188-194
Cohort studies
cholesterol and aging, 235-245
comorbidity and survival with human immunodeficiency virus (HIV), 420-43
familial correlations for cardiovascular disease risk factors, 188-194
lipoproteins and lifestyle parameters, 246-256
The NHANES I Epidemiologic Follow-up Study, 259-262
physical fitness and cancer mortality, 452-457
rapid decline in forced expiratory volume, 217-227
uric acid and atherosclerosis, 331-340
Western blot patterns and human immunodeficiency virus (HIV) progression, 341-347
Colon, colorectal cancer and lifestyle parameters, 276-282
Colorectal cancer, lifestyle parameters and, 276-282
Comorbidity
black-white differentials and, 381-385
breast cancer and, 413-419
diabetes, hypertension, stroke, and, 392-398
elderly and, 376-380, 399-412
human immunodeficiency virus (HIV) and, 420-430
Condoms, alcohol and sexual behavior, 357-364
Connective-tissue disease, prosthetic implants and, 530-540
Coronary heart disease
Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
lipoprotein(a) correlates in Japanese and U.S. populations, 324-330
lipoproteins and lifestyle parameters, 246-256
The NHANES I Epidemiologic Follow-up Study and, 259-262
sudden death and, 130-136
Cross-cultural comparison, lipoprotein(a) correlates in Japanese and U.S. populations, 324-330
Cross-sectional studies
diabetes, hypertension, stroke, and, 392-398
smoking and, 474-475, 476-482

D

Death certificates
from Beneficiary Identification and Records Locator Subsystem, 102-109
from Social Security Administration, 102-109
Death rates, coronary heart disease, 130-136

AEP Vol. 6, No. 6
November 1996: 548–554

Dementia, epidemiologic research and ascertaining, 431-437
Depression
  human immunodeficiency virus (HIV) and, 420-430
  television viewing and, 154-159
Diabetes, The HERITAGE Family Study and, 520-529
Diagnosis
  alcohol dependence, 458-462
  Lyme disease, 24-29
Diet
  age and, 235-245
  cataracts and, 41-46
  colorectal cancer and, 276-282
  food-frequency questionnaire validation, 110-118
  The Women's Health Trial Feasibility Study in Minority Populations and, 507-519
Dietary fat, The Women's Health Trial Feasibility Study in Minority Populations and, 507-519
Disability, comorbidity in elderly and, 376-380
Disease, study of, 371, 463-468
Disease monitoring and forecasting, global epidemiology and public health, 162-167
Drug abuse treatment, human immunodeficiency virus (HIV) risk behavior after, 119-125
Drug adherence, Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
Drug use, recreational, acquired immunodeficiency syndrome (AIDS) and, 283-289

E
Elderly
  ascertaining dementia in epidemiologic research, 431-437
  atherosclerosis and estrogen/progestin replacement therapy in, 314-323
  cancer and comorbidity in, 399-412
  cardiovascular disease incidence and survival trends in, 348-356
  comorbidity and, 376-380
  diabetes, hypertension, stroke, and, 392-39
  early intervention in Parkinson's disease, 438-441
  functional impairment with, 386-391
Eosinophils, counts in men, 299-306
Epidemiologic research, ascertaining dementia in, 431-437
Epidemiology
  Alzheimer's disease, 195-200
  diabetes mellitus, race, and socioeconomic status, 67-73
  early intervention in Parkinson's disease and, 438-441
  identifying risk factors, 463-468
  Lyme disease, 24-29
  minority group recruitment and, 4-11
  risk behaviors, 463-468
  science of (editorial), 369-370
  study of disease in, 371, 463-468
Estrogen, atherosclerosis and, 314-323
Estrogen/progestin replacement therapy, atherosclerosis and, 314-323
Estrogen replacement therapy, atherosclerosis and, 314-323
Ethnicity, obesity in women and (editorial), 263-265
Exercise, pregnancy and, 53-59
Exercise training, The HERITAGE Family Study and, 520-529

F
Familial correlation, cardiovascular disease risk factors and, 188-194
Family study, The HERITAGE Family Study, 520-529
Fat intake, risk of cataracts and, 41-46
Federal Scene section introduction, 1-3
Fertility, lead exposure in males and, 201-208
Fibrinogen, lipoprotein(a) correlates in Japanese and U.S. populations and, 324-330
Fish, cardiovascular disease risk factors and, 290-298
Fish oils, cardiovascular disease and, 137-146
Follow-up studies, Beneficiary Identification and Records Locator Subsystem and, 102-109
Food-frequency questionnaire, validation, 110-118
Forced expiratory volume and, rapid decline in, 217-227
Fractures, fluoride and, 209-216
Fruit intake, risk of cataracts and, 41-46

G
Genetics, The HERITAGE Family Study and, 520-529
Geographic variability, fractures, fluoride, and, 209-216
Girls, race, socioeconomic factors, and obesity in, 266-275

H
Health, relationship between socioeconomic status and (editorial), 21-23
Health promotion, television viewing and (editorial), 160-161
Health surveys, nonresponse effects on prevalence estimates, 498-506
Heart disease, birth order and, 34-40
Heritability, cardiovascular disease risk factors and, 188-194
Hip, fractures and fluoride, 209-216
Hirsutism, blood pressure and, 181-187
Hispanics
  diabetes, hypertension, stroke, and, 392-398
  medical conditions effects on functional limitations in elderly, 386-391

HIV. *See* Human immunodeficiency virus (HIV)
Homosexuals, human immunodeficiency virus (HIV) and, 420-430
The Honolulu Heart Program
  cardiovascular disease prediction, 137-146
  risk factors and hyperinsulinemia in elderly men, 490-497
Hostility, television viewing and, 154-159
Human immunodeficiency virus (HIV)
  antibodies, 341-34
  comorbidity and survival with, 420-430
  risk behavior
    after drug abuse treatment, 119-125
    alcohol and, 357-364
  seroconversion, 357-36
  Western blot patterns and progression of, 341-347
Hypertension
  African Americans and (editorial), 171-172
  Blacks and severity of, 173-18
  The NHANES I Epidemiologic Follow-up Study and, 259-262
  television viewing and, 154-159

I

Idiopathic progresssive neuropathy, prosthetic implants and, 530-540
Implants, chronic diseases and prosthetic, 530-540
Income. *See* Socioeconomic factors
Insulin, cardiovascular risk factors and hyperinsulinemia in elderly men, 490-497
Intervention, The Women's Health Trial Feasibility Study in Minority Populations and, 507-519
Ionizing radiation, cancer mortality and, 126-129
Iron intake, preschool children and relationship between blood lead and, 30-33
Ischemic heart disease, leukocyte counts in men and, 74-82, 299-306

J

Japanese, lipoprotein(a) correlates in Caucasians and, 324-330
Japanese-Americans, colorectal cancer and lifestyle parameters, 276-282

L

Laboratory markers, acquired immunodeficiency syndrome (AIDS) and, 283-289
Lead exposure, duration of, fertility rates and, 201-208
Leukocytes, counts in men, 74-82, 299-306
Lifestyle
  colorectal cancer and, 276-282
  lipoproteins and, 246-256
Lipoprotein(a), correlates in Japanese and U.S. populations, 324-330
Lipoproteins, lifestyle parameters and, 246-256
Longitudinal studies, alcohol problems, psychiatric disorders, and attrition in, 228-234
Lyme disease, surveillance, 24-29
Lymphocytes, counts in men, 299-306

M

Macular degeneration, antioxidants and, 60-66
Manifestations, Lyme disease, 24-29
Marijuana, acquired immunodeficiency syndrome (AIDS) and, 283-289
Measurement bias, response error in self-reported smoking frequency, 483-489
Meat, cardiovascular disease risk factors and, 290-298
Medication compliance, Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
Men
  coronary heart disease and black, 130-136
  fertility and lead exposure among, 201-208
  leukocyte counts in, 74-82, 299-306
  occupation and suicide in U.S. military, 83-88
Methodology, ascertaining dementia in epidemiologic research, 431-437
Mexican-Americans
  medical conditions effects on functional limitations in elderly, 386-39
  migration status, socioeconomic status, and mortality rates in, 307-313
Micronutrients, antioxidants and, 60-66
Migration status, mortality rates and, 307-313
Military, occupation and suicide in males in U.S., 83-88
Minorities
  epidemiology profession and, 4-11
  The Women's Health Trial Feasibility Study in Minority Populations, 507-519
Monocytes, counts in men, 299-306
Morbidity
  black-white differentials and, 381-385
  social ties and, 442-451
Mortality
  Alzheimer's disease and, 195-200
  Beneficiary Identification and Records Locator Subsystem and, 102-109
  birth order and, 34-40
  Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
  hypertension severity in Blacks and, 173-180
  Mexican Americans and, 307-313
  nuclear sites and cancer, 126-129
  physical fitness and, 452-45

AEP Vol. 6, No. 6
November 1996: 548–554

relationship between income and, 12-20
social ties and, 442-451
Myocardial infarction, Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101

N

National Institutes of Health, prevention activities, 471-473
Neutrophils, counts in men, 299-306
Nicotine, response error in self-reported smoking frequency, 483-489
Nigerians, cardiovascular disease risk factors and, 290-298
Non-Hispanic Whites, migration status, socioeconomic status, and mortality rates in, 307-313
Nonresponder bias, alcohol problems, psychiatric disorders, and attrition with, 228-234
Nuclear installations, cancer mortality and, 126-129
Nursing homes, ascertaining dementia in epidemiologic research, 431-437
Nutrients, risk of cataracts and, 41-46

O

Obesity
cardiovascular risk factors and hyperinsulinemia in elderly men and, 490-497
diabetes mellitus, race, socioeconomic status, and, 67-73
girls and socioeconomic factors, race, and, 266-275
socioeconomic factors, ethnicity, and (editorial), 263-265
Occupation, occupation and suicide in males in U.S. military, 83-88
Occupational exposure, lead exposure in males and fertility, 201-208
Osteoporosis, fluoride and, 209-216

P

Parkinson's disease, early intervention in, 438-441
Physical activity, cancer mortality and, 452-457
Physical disability
diabetes, hypertension, stroke, and, 392-398
medical conditions and, 386-391
Physical fitness, cancer mortality and, 452-457
Police, occupation and suicide in males in U.S. military, 83-88
Population-attributable risk, hypertension severity in Blacks and, 173-180
Population based, carotid intima-media thickness as indicator of atherosclerosis, 147-153
Poverty. *See* Socioeconomic factors
Pregnancy, exercise and, 53-59
Preschool children, relationship between blood lead and iron intake in, 30-33
Prevention, global epidemiology and public health, 162-167
Prevention-related research, National Institutes of Health and, 471-473
Progestins, atherosclerosis and, 314-323
Psychiatry, alcohol dependence and, 458-462
Public health
global epidemiology and, 162-167
minority group recruitment and, 4-11
Pulmonary disease, rapid decline in forced expiratory volume, 217-227

Q

Quality control, The HERITAGE Family Study and, 520-529

R

Race
comorbidity and breast cancer survival, 413-419
diabetes mellitus, socioeconomic status, and, 67-73
hypertension severity and, 173-180
leukocyte counts in blacks, 74-82
migration status, socioeconomic status, and mortality rates by, 307-313
obesity in girls and, 266-275
obesity in women and (editorial), 263-265
response error in self-reported smoking frequency and, 483-489
smoking and (editorial), 474-475
Radiation, ionizing, cancer mortality and, 126-129
Recreational drug use, acquired immunodeficiency syndrome (AIDS) and, 283-289
Rectal cancer, lifestyle parameters and, 276-282
Relative risk, hypertension severity in Blacks and, 173-180
Reproducibility, Behavioral Risk Factor Surveillance System Questionnaire and, 47-52
Risk adjustment, health care outcomes and (book review), 365-366
Risk behavior, influencing, 463-468
Risk factors
adolescents and smoking, 474-475, 476-482
cardiovascular diseases, 137-146
cataracts and, 41-46
cholesterol and aging, 235-245
coronary heart disease and, 130-136
diabetes mellitus, race, and socioeconomic status, 67-73
familial correlations for cardiovascular disease, 188-194
hyperinsulinemia in elderly men and cardiovascular, 490-497

identifying, 463-468
lipoproteins and lifestyle parameters, 246-256
rapid decline in forced expiratory volume, 217-227

S
Safe sex, alcohol consumption and, 357-364
Schools, public health, minority group recruitment and, 4-11
Screening
Behavioral Risk Factor Surveillance System Questionnaire and, 47-52
Parkinson's disease, 438-441
Sebum, blood pressure and, 181-187
Sedentary lifestyle, The HERITAGE Family Study and, 520-529
Selection bias, nonresponse effects on prevalence estimates and, 498-506
Self-report, Behavioral Risk Factor Surveillance System Questionnaire and, 47-52
Serum fatty acids, cardiovascular disease risk factors and, 290-298
Sex factors, relationship between mortality and, 12-20
Sexual behavior, alcohol consumption and, 357-364
Silicone, chronic diseases and, 530-540
Smoking
acquired immunodeficiency syndrome (AIDS) and, 283-289
adolescents and, 474-475, 476-482
cardiovascular disease and, 137-146
colorectal cancer and, 276-282
human immunodeficiency virus (HIV) and, 420-430
leukocyte counts in men and, 74-82, 299-306
race and, 476-482
race and (editorial), 474-475
rapid decline in forced expiratory volume and, 217-227
response error in self-reported smoking frequency, 483-489
Surgeon General's Report on Smoking and Health, 372-375
television viewing and, 154-159
Social environment, health and, 442-451
Social isolation, health and, 442-451
Social Security Administration, death certificates from, 102-109
Social ties, benefits of, 442-451
Socioeconomic factors
cardiovascular disease risk factors and, 290-298
diabetes mellitus, race, and, 67-73
mortality rates and, 307-313
obesity in girls and, 266-275
obesity in women and (editorial), 263-265
relationship between health and (editorial), 21-23
relationship between mortality and, 12-20
Stroke, The NHANES I Epidemiologic Follow-up Study and, 259-262
Student recruitment, epidemiology profession and, 4-11
Sudden death, coronary heart disease, 130-136
Suicide, occupation and suicide in males in U.S. military, 83-88
Surgeon General's Report on Smoking and Health, sequels, 372-375
Surveillance, Lyme disease, 24-29
Survey methods, nonresponse effects on prevalence estimates and, 498-506
Survival
Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
comorbidity and breast cancer, 413-419

T
Telecommunications, global epidemiology and public health, 162-167
Television viewing
cardiovascular risk factors and, 154-159
health promotion and (editorial), 160-161
obesity and (editorial), 160-161
obesity in girls and, 266-275
Treatment, Lyme disease, 24-29
Treatment efficacy, Cardiac Arrhythmia Suppression Trial (CAST) and, 93-101
Trends
cardiovascular disease incidence and survival in elderly, 348-356
cholesterol and aging, 235-245
Triglycerides, age and, 235-245

U
Ultrasound, carotid intima-media thickness, 147-153
Uric acid, atherosclerosis and, 331-340

V
Vaccines, acquired immunodeficiency syndrome (AIDS), 341-347
Validation, food-frequency questionnaire, 110-118
Vegetable intake, risk of cataracts and, 41-46
Vital statistics, from Beneficiary Identification and Records Locator Subsystem, 102-109
Vitamins, age-related eye disease and, 60-66

W
Weight, The Women's Health Trial Feasibility Study in Minority Populations and, 507-519
Western blot patterns, human immunodeficiency virus (HIV) progression and, 341-347

AEP Vol. 6, No. 6
November 1996: 548–554

Women
atherosclerosis and estrogen/progestin replacement therapy in elderly, 314-323
Behavioral Risk Factor Surveillance System Questionnaire and, 47-52
blood pressure and, 181-187
exercise during pregnancy, 53-59
women's health (book review), 89-90
The Women's Health Trial Feasibility Study in Minority Populations, 507-519
